

CNCS 100 Super EDM Cleaner

The latest in effective cleaning of wire EDM machines. Fast, efficient, cost effective, and without damage to your conductivity or resin system.

CNCS 100 Super Cleaner is designed to maintain good housekeeping of your EDM machine. By the use of the machine, mineral deposits form in the work area and on the pedestals. These deposits can cause power leeching, causing a loss of speed and machine efficiency. Over time this can result in machine damaged and expensive repairs.

The common practice of using toilet bowl cleaners is a dangerous and very expensive method of cleaning your machine. These products are effective in cleaning the machine area but can damage the conductivity of the machine and could potentially damage your resin. Both situations cost money and machine down time.

CNCS 100 is the solution. CNCS 100 is an acid based detergent that is extremely effective In removing mineral deposits from the machines while being very cost effective. In addition, CNCS 100 will NOT affect the machine conductivity and WILL NOT harm your resin.

CNCS 100 offers you a very effective low cost method to maintain your machine and keep It In top operating condition. Available in 1 gallon bottles from your local distributor.

CNCS 100 is recommended by leading EDM Machine Tool Builders.
